## SUMMARY

Detail-oriented Software Engineer with a **Master's in Computer Science from USC**, with **5 years** of expertise in backend, frontend, and cloud technologies. Passionate about **innovative** problem-solving, **scalable** system design, and delivering high-quality, impactful solutions in **agile**, mission-driven environments. Being an **artist**, I bring unique perspectives to problem-solving and have a deep **curiosity** to explore and master new technologies.

## EDUCATION

|                                                                                                                      |                                                       |
|----------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| <b>University of Southern California</b><br>Master of Science in Computer Science   <b>GPA: 3.90</b>                 | Los Angeles, California<br><b>Aug 2021 - May 2023</b> |
| <b>Pune Institute of Computer Technology</b><br>Bachelor of Engineering in Information Technology   <b>GPA: 3.82</b> | Pune, India<br><b>Aug 2014 - Jun 2018</b>             |

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                             |
